

# Staying Connected with Campus Services

Provost Joe Helble and EVP Rick Mills shared encouraging news this week that, "employees who are presently working remotely will return to campus around Sept. 1, 2021." It will be good to have a sense of normalcy and to see each other in person. Thanks to Mary Frailey for sharing this photo of Sweet Pea who was rescued from Tennessee this summer. Thanks again to all who shared their cute pandemic pets.

## Meet Interim EH&S Director

Please welcome Peter Schneider, the new interim director of Environmental Health & Safety (EH&S) who will serve in this role from Feb. 22 until a permanent director is hired. A national search begins in March. Peter takes over from EH&S Director Megan Sandy whose last day at Dartmouth is March 5.

We're fortunate to have Peter join the EH&S team as he has tremendous, relevant experience. He is the founder and principal of Schneider Consulting, and for more than 20 years served as the EH&S Director at three major universities: University of Massachusetts-Boston (UMB), University of Texas-Austin and Boston University. Peter is also a Professor of Practice at UMB's School for the Environment. He has taught environmental management and hazardous material policy at Tufts University and Boston University.

Peter can be reached at the EH&S offices on the lower level of 37 Dewey Field Rd and at [Peter.L.Schneider@dartmouth.edu](mailto:Peter.L.Schneider@dartmouth.edu).

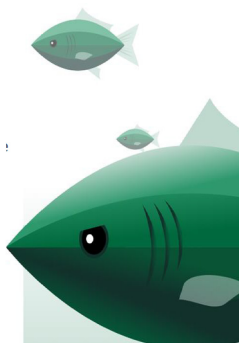

## Register for a Phishing Tournament

Dartmouth ITC is launching a Phishing Tournament to raise awareness and educate the community on the dangers of online phishing.

Phishing is a cybercrime that targets people by email, phone, or text messages in order to gain sensitive personal data that could result in identity theft or financial loss.

Through this tournament ITC hopes to reduce the number of phishing incidents on campus and reward those who participate. There are a number of terrific prizes, too.

To learn more and register for the tournament which runs March 29 - April 15, go to [gophish.dartmouth.edu](http://gophish.dartmouth.edu).

## Staff Kudos

This note acknowledges Nidhi Singh, a software engineer on the Technology Services team who is working to implement the Planon Facilities Management system.

*"I want to let you know how impressed I am with Nidhi. She is so helpful with everything. She has put the building contact list into Planon – I asked if there was a way I could export the email addresses [for future use, and] she figured it out and told me what I needed to do.*

*This saved me so much time, I can't even begin to tell you what the process has been in the past. I was also less stressed because the information was the most accurate it has been.*

*I have to say the [implementation] team as a whole is pretty incredible as well."*

— Robin Guay, Work Process Manager

The following two notes were directed to Skiway Manager Mark Adamczyk:

*I wanted to let you know that the community is really feeling the new vibe that you're bringing to the [Skiway]. The changes in uphill travel policy alone have been a big plus. Employees generally seem more stoked and friendly too. I just saw in your newsletter today that you are adding some small park features and soliciting input from the community. Kudos on all these developments!*

— Skiway visitor Nicholas Reo

*Despite the immense challenges due to the pandemic, the changes at the Skiway are obvious and positive in every way. The atmosphere is welcoming - even joyous! You and your staff deserve so much credit for embracing and cultivating all aspects of our ski community. The "chatter" on the hill is all about the friendly hellos from the lift attendants, the waves from staff in the evening as people skin for some uphill exercise, the collegial cooperation working with the FS coaches... and just about what a joy it is to be at the Skiway generally.*

— Skiway visitor Campbell Levy
