

Staying Connected with Campus Services

As students return to campus and start exploring their new surroundings, you should do the same. Take a walk around Occum Pond and notice the newly renovated DOC House, wander down Tuck Mall to check out construction progress, or see what's on display at the Hood Museum. This is your campus, too. Enjoy all that it has to offer.

Staff Kudos

This message was sent to Custodial Services Manager Sandra Sowle.

Our housekeeper Janney [Jan Jurgelwicz] is soooo wonderful! She always has a smile and is so kind to staff and students, I just want her supervisor to know how much we appreciate her! I know there are Dartmouth recognitions, and we will definitely do that but just want everyone to know how much we value her here at Dick's House!

Thank you, Tricia, RN
Dick's House Nursing Department

Parking Update

For the period Sept.—Dec. 2021, Dartmouth Transportation Services will not charge employees for parking. Please continue to display the last permit issued to you when your vehicle is parked on campus through Dec. 2021. A decision will be made in late fall regarding charges for parking starting in Jan. 2022.

As of Sept. 1, permits are only valid for parking in the lots for which they are issued. New employees parking on campus, or those who need a replacement permit, should contact Transportation Services via email for instructions. Please note the lot behind 4 Currier is permit only 24x7 through the Real Estate Office.

Please contact transportation.services@dartmouth.edu, or (603) 646-2340, if you have any questions about the parking policy.

Seeking Volunteers for Picnic

If you enjoy meeting people, volunteer to help serve food at this year's Community Picnic to be held Sept. 13 from 11:30am - 2:30pm on the Dartmouth Green. This annual celebration is being hosted by Dartmouth Dining who is looking for servers to work in 30-minute shifts on the top and bottom of each hour. Those interested in helping out should contact Brandon Crosby at brandon.w.crosby@dartmouth.edu. Thanks, in advance, for your assistance.

Latest on COVID testing

Dartmouth recently changed its testing protocols in response to the uptick in COVID-19 cases in the local area. Here is a summary of what you need to know.

Testing frequency: Vaccinated employees working on-campus should be tested weekly; unvaccinated employees should continue to be tested twice weekly.

On-campus testing is located for 1st-shift employees in the West Gym at Alumni Hall on East Wheelock Street. 2nd-shift testing is offered on Tuesdays and Thursdays from 5-6pm on the 1st Floor of 4 Currier.

Everyone taking advantage of on-campus testing should make an appointment at health-clinics.dartmouth.edu/ where hours of testing are posted.

Take-home testing kits are being introduced to all employees involved in surveillance testing. As Chief HR Officer Scot Bemis recently wrote, "This new testing format, which is being introduced for convenience and expediency, is being rolled out by department/division, and you will be notified when it is your turn to begin take-home testing. You will receive instructions for picking up labels and a testing kit and information about your designated testing kit drop-off location.

On-site testing will continue to be available for those who need to use it."

Face coverings are required when working indoors on College premises, except when working alone in a private office (please see the [face-covering policy](#)).

Dartmouth Dining Antics

Thanks to DDS for providing a fun and festive welcome to students!
